

Alonso Ramírez De Pablos Velez

Profile

Electronics and communications engineer with a wide variety of knowledge in multiple projects of the electronic industry.

Academic background

Electronic and communications engineer 2020
Universidad de Guadalajara (CUCEI)

Work experience

Audio and light Technician 2016-07 - 2019-03
Room 46

- Cabling, calibration and maintenance of audio systems and lights
- Monitoring behavior of diverse systems based on software focused on lights and audio
- Determine the most optimal arrange to maximize the area in which the sound spreads
- In case of technical failure, fix said problem as quickly and efficiently as possible.
- Creating original audio samples and Mashups using DAWs like Ableton Live and FI Studio 12

Debug Technician Skills 2021-02 - 2022-03
Flex (Flextronics)

- Providing feedback to the production line related to the multiple issues that might be presented in the boards.
- Using schematics, TestExpert and Allegro to locate the reason behind a certain issue in the boards.
- Using X-ray machine (DAGE) to locate imperfections in the soldering of certain components.
- Writing FA reports of critical issues in the boards and present them to the engineering team for replacement of highly expensive components or processing units for scrap.
- Worked in multiple projects like: Amazon, Ciena, Quantum, WatchFire, Philo, Arista and Cisco.
